

Skyline Monitor Portals

Raising the Standard of Data Collection and Management

Questions, questions, questions...

Apart from death and taxes, one other certainty in life is that "Information is King!" But doesn't it seem that an ever increasing amount of data has to be collected, regularly and repeatedly? Don't such exercises invariably appear to be thankless, time-hungry and therefore expensive tasks? Don't they seem to be made worse because the results are often out of date or just inadequate and not fit for purpose?

The bar has been raised and Skyline is fit for the new purpose!

The bar has been raised and you can now jump clean over it!

What if there was a solution that was "*fit for a new purpose*", fit for the purpose of jumping clean over the raised bar from a standing start and do so in just one, comfortable leap?

What if there was a solution that would transform processes at every level of statistical data information management?

A solution that would dynamically project results, distribute reports and give accessibility to real-time statistics 24/7 - 365 to those who need the answers...and need them NOW!

A solution that would transform statistical data gathering and many information management tasks - locally, regionally or even nationally in just a few simple clicks.

Wouldn't that be good?

Well, the solution is available right now.
It is called **Skyline SitRep Monitoring**.

A Free Trial is just 1 simple step away – Email info@info@skylineSitRep.com or call 0800 046 7404

Myriad Optima Ltd. Reg. Office: 3 Chiltern Works, Chiltern Drive, Surbiton, KT5 8LS

Staff at the Sharp End need the right tools for the job!

Even more questions...

If you can tick even just one of the following, then, ***please let us show you something you will never have seen before!***

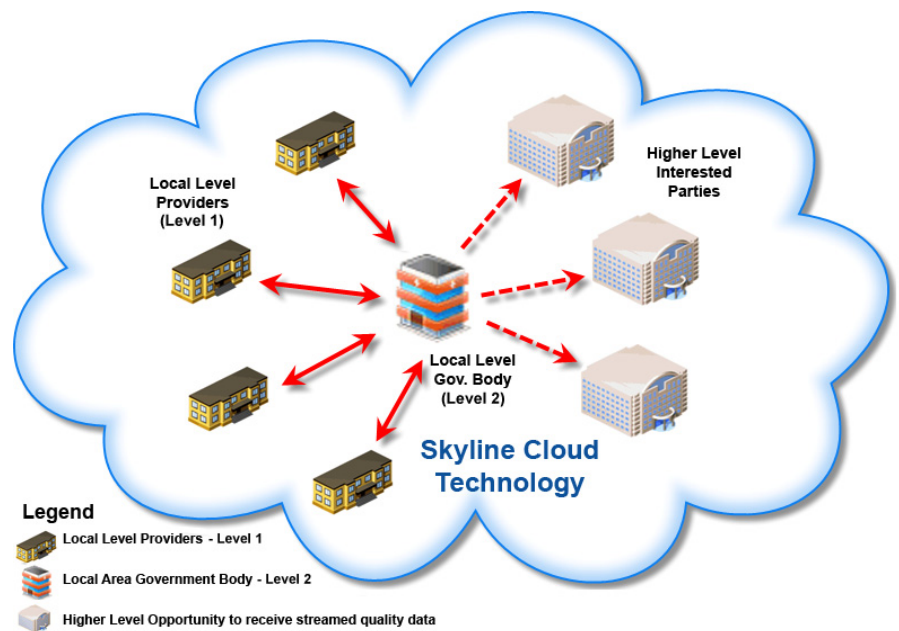

- Do you see the value of having access to quality statistical data?
- Would you like to see poor data as a thing of the past?
- Is it important to you that your colleagues use time efficient tools?
- Do you know any team that has data gathering tasks to perform?
- Are you worried about change or transformation?
- Would you like to see something the simplicity of which will make you smile?
- Are you concerned about Data Protection with existing data gathering, possibly outside of the UK?
- Are you prepared to be amazed on every count including cost?
- Would you like to stop reading about questions and know more?

All These Services Can Benefit From Skyline Monitoring solutions to monitor Availability / Vulnerability of Services:-

- **Social Services / Environment**

 - Automatic Feeds from Category 2 Providers
 - GPs' Surgeries
 - Pharmacists
 - Specialist Doctor Skills
 - Specialist Nursing Staff Skills
- **Any Service**
 - Pulse Surveys
 - Virtually any reason someone can think of where quality real time data would be useful

How It Works: - The Administration takes Just 7 Simple Steps

1. A Portal can be available in minutes
2. Following a free trial, brief the Level 1 Providers that the system is to be implemented. No training is required for them
3. Choose the questions to be put to the Level 1 Providers
4. Bulk-load the Level 1 Providers by chosen categories
5. Send the questionnaire email to the selected Level 1 Providers, in a single click
6. Receive the replies to the emails from each of the Level 1 Providers in a single click that updates the data automatically
7. Filter Level 1 Providers to View statistics and auto-generate reports in a single click
8. Availability - 24 / 7 - 365

Getting Started Is Easy – You can even have a free trial

By utilising our expertise in BCMS Cloud Technology you can be set-up with a 14 day trial in literally minutes, with zero impact on any existing ICT resources.

Set-up/14 Day Trial: - included

Training: - included - 30 minutes online

Technical Support: - Included (Email and Live Assistant)

System Hosting: - included. There is zero impact on in-house ICT and server resilience

Promotional Offer: - Maximum fee £1,500 + VAT per Service
Special Promotional Code LGA001
please ask for details

There is now no need to rely on old or outdated methods
